

X-BOND: THE EFFECTIVE TRIPLE-ACTION ELIMINATOR FOR EVERY MYCOTOXIN PROBLEM

Pigs depend on their feed to keep them healthy and productive. So, when natural mycotoxins contaminate feed crops, the impact on pig growth and development can be dramatic – with lost earnings for farmers as a result.

Vilomix has developed X-Bond to minimize and prevent this risk. A triple-action toxin eliminator, X-Bond not only binds and deactivates naturally occurring mycotoxins. It supports animal health and performance by delivering a functional nutrient complex.

X-Bond is a combination of clay minerals, hydrolysed yeast cells and functional additives, including enzymes, vitamins and minerals.

X-Bond is available in three variants, each with a one-year shelf life.

**80% OF FEED CROP
SAMPLES CONTAINED
MYCOTOXINS IN
A RECOGNISED
GLOBAL SURVEY**

SOURCE: BIOMIN MYCOTOXIN SURVEY

BIND

Clay minerals and hydrolysed yeast adsorb mycotoxins so they cannot enter the blood stream

DEACTIVATE

Enzymes transform mycotoxins into non-toxic metabolites

SUPPORT

A tailored nutrient complex boosts gut, liver and immune function

WHY WAIT FOR A PROBLEM?

X-BOND GIVES A FAST RETURN

Mycotoxin-contaminated feed is a known cause of loss of appetite and vomiting, declining reproduction and an increased mortality rate all in all resulting in a lower growth performance.

But why wait for that to happen? Tests show that X-Bond gives a positive return on investment when pig productivity drops just 1%. Whether you have a known mycotoxin problem or want to avoid one, X-Bond always makes good business sense.

HOW TO USE X-BOND?

		X-BOND BASIC	X-BOND STANDARD	X-BOND PREMIUM
	DOSAGE	1-3 KG / TONS FEED*	1-2 KG / TONS FEED*	1-2 KG / TONS FEED*
	RISK OF CONTAMINATION**	PREVENTIVE/LOW	LOW/MEDIUM	MEDIUM/HIGH
MYCOTOXINS	AFB, OTA, ERGOTS	✓✓✓	✓✓	✓✓
	DON, FUM	✓	✓✓✓	✓✓✓
	ZEN	✓✓		✓✓✓
	ADDITIONAL LIVER/ OXIDATION STRESS PROTECTION	✓	✓✓	✓✓✓

* Depends on contamination level

** Depending on: Predictions for local harvest, storage conditions of grain, analyzes of feed and visible symptoms in herd
